Perform Cos’s trick from The Silver Thief!
Make this magic prop to use with the instructions from the book.

REQUIRED ITEMS:
Printed templates
Cardboard (optional)
Scissors
Glue
Trick instructions inside The Silver Thief

METHOD:
1. Cut around the solid lines of the Box, Lid, and Cube templates. Glue the templates onto cardboard before cutting to make your props extra strong.
2. The dotted lines show where to fold. Fold along each dotted line to make a crease. Make all folds toward the inner, unprinted side.
3. Put a thin layer of glue on each panel marked “glue.”
4. Fold again:
   a. For the Box, fold the small panels and sides first, the largest side last, pressing firmly against the glue panels.
   b. For the Lid, fold the sides with the glue panels first and the large square side last, pressing firmly against the glue panels.
   c. For the Cube fold the small panels and sides first, the largest side last, pressing firmly against the glue panels.
5. Wait fifteen minutes for the glue to dry.
6. Place the Cube inside the Box and cover with the Lid.
7. Now your trick is ready to use! Follow the instructions in The Silver Thief.

TIP: Make your Vision Box even more mysterious by drawing a special design on the Lid.
You can decorate the Box, too, but just make sure the sides and the base all look exactly the same (or your illusion won’t work!).
